

MEDIA RELEASE

Trinidad & Tobago's Energy Services take Center Stage at World's Largest Energy Offshore Event

Houston, Texas – May 7, 2024 – Trinidad and Tobago is one of [14 international country pavilions](#) being featured at the 2024 Offshore Technology Conference (OTC). State-owned National Energy Corporation of Trinidad & Tobago Limited (National Energy) is the lead for the promotion of the country's diverse range of energy services at this prestigious global event that brings together industry leaders, investors, buyers, and entrepreneurs in the offshore energy sector.

National Energy, representing the Government of Trinidad and Tobago, has established its presence through a dedicated Country Pavilion at Booth #4747 to connect with potential partners and showcase Trinidad and Tobago's comprehensive range of energy services, including upstream, midstream, downstream, engineering, infrastructure, logistics, and professional services.

This participation at OTC signifies Trinidad and Tobago's commitment to be a leader in the provision of energy services to the international energy market while simultaneously transitioning the country's downstream energy sector towards a cleaner and more sustainable future.

Participating companies within the Pavilion are:

1. National Energy Corporation of Trinidad & Tobago Limited (National Energy)
2. Ramps Logistics Limited
3. Inland and Offshore Contractors Limited (IOCL)
4. Tembladora Energy Logistics (TEL)
5. Dumore Enterprises Limited
6. Qualitech Machining Services Limited (QMS)
7. El Dorado Offshore (EDO)

Attendees at the Conference are invited to visit Booth #4747 at the Trinidad and Tobago Pavilion to explore collaborative opportunities and discover how Trinidad and Tobago can meet their dynamic and complex energy needs.

About Trinidad and Tobago

Trinidad and Tobago boasts over 100 years of experience in the oil and gas sector, positioning itself as a key partner for the global energy industry. As a first mover in the development of key energy services, Trinidad and Tobago still ranks among the top five producers and exporters of both methanol and ammonia globally. Notwithstanding its continued involvement in the oil and gas sector, the country recognises the critical need for a low carbon future and is committed to transitioning its energy sector towards long-term sustainability.
